Heat away the weeds

Gardener

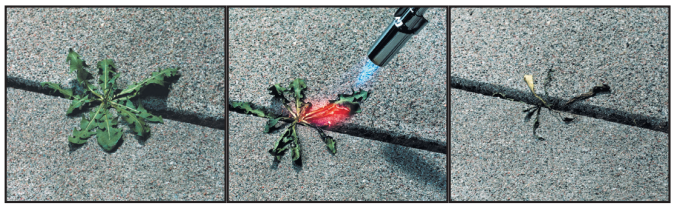
Heat away the weeds

- Convenient - Saves your knees and back
- Environmentally friendly - No chemicals
- Automatic piezo ignition - No matches needed

Gardener no.	223001	223101	223097
Gas Consumption, g/h	300	400	400
Length, mm	770	700	700
Weight, g	750	750	750
Connection	EU	Sievert	US

Cylinder/gas cartridge not included

Slowly sweep the burner about 5 cm above the weeds. The plant shall be heated, not burned. The heating causes the cell walls in the plant to burst and the plant dies of drying out. A correct heating can be checked by pressing a leaf between the fingertips. A dark green fingerprint shall then appear on the leaf.



Weed. Heat it. 2-3 days later.

After 2-3 days the weeds have wilted completely - with just the need to sweep up and compost. The treatment is best carried out in spring and is most effective against small weeds. Small annual weeds die completely after one treatment. Grass, dandelion and other perennial weeds need repeated treatment throughout the growing season.
